## PRISMA

We believe that patients and your caregivers should have easy access to your medical information, no matter where you receive care. That is why we are participating in PRISMA, a service that allows a network of healthcare providers to identify you, securely send and receive your medical information, and help ensure that you receive optimal care.

### What is PRISMA?

Prisma stands for Patient Record Information Search Module Aggregator. It is a free, secure service offered by your doctor, so your health information can be available to you and your doctors regardless of where you have received care.

### How do we use the health information we share through PRISMA?

- **Better coordinate your care across different doctors** – We will provide and request to receive your information where and when it is needed for your healthcare provider to deliver the care you need as you move from doctor to doctor.
- **Support better care decision-making** – With timely access to information from other healthcare providers you have seen, your doctors may be able to make better decisions about your health.
- **Deliver care more promptly and efficiently** – With less time wasted on Tracking down your test results and other health information, your healthcare providers can treat you more efficiently and spend less time on paperwork and more time on your care.
- **Securely and confidentially** – Your Protected Health Information (“PHI”) will always be confidential and used to inform the PRISMA participating healthcare providers. We will not use your PHI for discriminatory purposes of any kind or to deny medical treatment.

You can opt out of this service at any time by calling or visiting this doctor’s office and asking them to unenroll you from PRISMA.
